

Cover Letter: Application for CFO AI Strategist Role

Dear Hiring Team,

I am excited to apply for the CFO AI Strategist role at Goldman Sachs. The opportunity to contribute to one of the firm's key priorities for 2025, driving operational efficiency and innovation through AI and GenAI, aligns perfectly with my passion for building real-world AI solutions that create tangible business impact.

With a Bachelor's degree in Electronics and Communication Engineering and hands-on experience developing AI and GenAI models, I have successfully delivered solutions across NLP-driven chatbots, predictive financial models, and backend AI system integrations. My technical expertise includes Python, TensorFlow, PyTorch, Scikit-learn, Huggingface, and backend deployment with Docker, Django REST, AWS, Celery, and Redis. I am particularly interested in applying state-of-the-art techniques such as Retrieval-Augmented Generation (RAG), AI agents, and large-scale language models to solve complex business challenges.

I am eager to collaborate with cross-functional teams, leveraging my skills in both AI engineering and business problem-solving, while continuously learning and staying updated on emerging GenAI advancements. The chance to work alongside Goldman Sachs Engineering and CFO teams to integrate cutting-edge AI into critical domains such as Risk, Controllers, and Legal excites me deeply.

You can explore my portfolio for a deeper look into my work and projects: <https://somanatz.github.io/developerFolio/>

Thank you for considering my application. I look forward to the possibility of contributing to Goldman Sachs' AI vision and delivering innovative solutions that drive meaningful outcomes.
